

Webinar series with partners:

1. Webinar Series CGIAR/The Alliance

The webinar series, organised by CGIAR and the Resilient Local Food Supply Chains Alliance, aims to facilitate knowledge sharing particularly relevant for food systems with multiple structural vulnerabilities which expose people to environmental and health shocks. The webinar series aims to create cooperation between countries and institutions in knowledge and best practices sharing for building resilient local food supply and value chains.

The purpose is to deepen knowledge exchange by linking up countries, partners, youth and women groups in the Alliance on best practices, evidence of successes and challenges in implementation of innovations related to the Alliance priorities and show integrated approaches/linkages with other coalitions.
